2022 年秋大学英语 A 期末试题（回忆版）

笔者：夏提雅

免责声明：本试题是在离开考场后回忆出来的，不存在任何作弊行为；本回忆版试题中选词填空中不保证待选词的顺序与原题一致，也不保证提示语一致，作文题目不与原题完全一致，但需要写的核心内容一致。

第一部分：听力理解（本部分共 35 小题，每题 1 分，共 35 分）

Section A

Directions: *In this section, you will hear three news reports. At the end o f each news report, you will hear two or three questions. Both the news report and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on* ***Answer Sheet 1*** *with a single line through the centre.*

Questions 1 and 2 are based on the news report you have just heard.

1. A) It studied the effects of exercise on sleep.
   B) Its participants came from various walks of life.
   C) Its findings confirmed those of previous studies.
   D) It ran for as long as some thirty years.
2. A) Eating more vegetables instead of meats.
   B) Drinking water instead of beverages with added sugar.
   C) Consuming more energy drinks and sports drinks.
   D) Forming the habit of exercising regularly.

Questions 3 and 4 are based on the news report you have just heard.

3. A) He asked them about his lost paintings.
   B) He knew the owner of two missing paintings.
   C) He left his paintings at a highway rest stop.
   D) He found two 17th-century oil paintings.
4. A) They are imitations. C) They were stolen by an Italian boy.
   B) They are originals. D) They came from the same artist.

Questions 5 to 7 are based on the news report you have just heard.

5. A) Look after her grandfather. C) Save her sick grandmother.
   B) Leave the remote cold region. D) Flee from the threat of bears.
6. A) She has to face a criminal charge.
   B) She was found lying motionless in the snow.
   C) She searched for her daughter in freezing cold.
   D) She works in childcare services.
7. A) She was found in a forest after three days.
   B) She lay totally unconscious for three days.
   C) She suffered from the effects of severe cold.
   D) She was finally rescued by her relatives.

Section B

Directions: *In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be*

spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on ***Answer Sheet 1*** *with a single line through the centre.*

Questions 8 to 11 are based on the conversation you have just heard.

8. A) He prefers the smaller evening classes.
   B) He has signed up for a day course.
   C) He has to work during the day.
   D) He finds the evening course cheaper.
9. A) Learn a computer language.
   B) Learn data processing.
   C) Buy some computer software.
   D) Buy a few coursebooks.
10. A) Thursday evening, from 7:00 to 9:45.
    B) From September 1 to New Year’s eve.
    C) Every Monday, lasting for 12 weeks.
    D) Three hours a week, 45 hours in total.
11. A) What to bring for registration.
    B) Where to attend the class.
    C) How he can get to Frost Hall.
    D) Whether he can use a check.

Questions 12 to 15 are based on the conversation you have just heard.

12. A) A training coach.
    B) A trading adviser.
    C) A professional manager.
    D) A financial trader.
13. A) He can save on living expenses.
    B) He considers cooking creative.
    C) He can enjoy healthier food.
    D) He thinks take-away is tasteless.
14. A) It is something inevitable.
    B) It is frustrating sometimes.
    C) It takes patience to manage.
    D) It can be a good thing.
15. A) The element of uncertainty and the mental challenge.
    B) The element of certainty and physical challenge.
    C) The way he deals with all kinds of emotions.
    D) The success that his stressful job brings about.

Section C

Directions: *In this section, you will hear three passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on* ***Answer Sheet 1*** *with a single line through the centre.*

Questions 16 to 18 are based on the passage you have just heard.

16. A) Paying hospital bills for emergency cases.
    B) Doing research on ear, nose and throat diseases.
    C) Removing objects from patients’ noses and ears.
    D) Providing routine care for small children.
17. A) Children aged one to four are often more curious than older children.
    B) Five- to nine-year-olds are the most likely to put things in their ears.
    C) Many children like to put foreign objects in their mouths.
    D) Many children like to smell things they find or play with.
18. A) They want to attract attention.
    B) They tend to act out of impulse.
    C) They are unaware of the potential risks.
    D) They are curious about these body parts.

Questions 19 to 21 are based on the passage you have just heard.

19. A) It gave her a used bicycle.
    B) It paid for her English lessons.
    C) It delivered her daily necessities.
    D) It provided her with physical therapy.
20. A) Expanding bike-riding lessons.
    B) Providing free public transport.
    C) Offering walking tours to visitors.
    D) Asking local people for donations.
21. A) It is a sports club.
    B) It is a language school.
    C) It is a counseling center.
    D) It is a charity organization.

Questions 22 to 25 are based on the passage you have just heard.

22. A) There were oil deposits below a local gassy hill.
    B) The erupting gas might endanger local children.
    C) There was oil leakage along the Gulf Coast.
    D) The local gassy hill might start a huge fire.
23. A) The massive gas underground.
    B) Their lack of the needed skill.
    C) Their lack of suitable tools.
    D) The sand under the hill.
24. A) It was not as effective as he claimed.
    B) It rendered many oil workers jobless.
    C) It gave birth to the oil drilling industry.
    D) It was not popularized until years later.
25. A) It ruined the state's cotton and beef industries.
    B) It totally destroyed the state's rural landscape.
    C) It resulted in an oil surplus all over the world.
    D) It radically transformed the state's economy.

Section D

Directions: *In this section, you are required to complete the note below.Write* ***ONE WORD AND/OR A NUMBER*** *for each answer on* ***Answer Sheet 2****.*

Holiday rental
Owners' names: Jack Fitzgerald and Shirley Fitzgerald **Granary Cottage** •available for week beginning ____26____May •cost for the week: 27 £_____ ____28_____**Cottage** •cost for the week: £480 •building was originally a ____29_____ •walk through doors from living room into a _____30____ •several _____31____spaces at the front •bathroom has a shower •central heating and stove that burns _____32____ •Views of old _____33____ from living room •View of hilltop ____34_____ from the bedroom **Payment** •deposit: £144 •deadline for final payment: end of _____35____

第二部分：阅读理解（本部分共 15 小题，每题 2 分，共 30 分）

Directions: *There are 3 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on* ***Answer Sheet 1*** *with a single line through the centre.*

Passage One

Questions 36 to 40 are based on the following passage.

The AlphaGo programs victory is an example of how smart computers have become.

But can artificial intelligence (AI) machines act ethically, meaning can they be honest and fair?

One example of AI is driverless cars. They are already on California roads, so it is not too soon to ask whether we can program a machine to act ethically. As driverless cars improve, they will save lives. They will make fewer mistakes than human drivers do. Sometimes, however, they will face a choice between lives. Should the cars be programmed to avoid hitting a child running across the road, even if that will put their passengers at risk? What about making a sudden turn to avoid a dog? What if the only risk is damage to the car itself, not to the passengers?

Perhaps there will be lessons to learn from driverless cars, but they are not super-intelligent beings. Teaching ethics to a machine even more intelligent than we are will be the bigger challenge.

About the same time as AlphaGo's triumph, Microsoft's 'chatbot' took a bad turn. The software, named Taylor, was designed to answer messages from people aged 18-24. Taylor was supposed to be able to learn from the messages she received. She was designed to slowly improve her ability to handle conversations, but some people were teaching Taylor racist ideas. When she started saying nice things about Hitler, Microsoft turned her off and deleted her ugliest messages.

AlphaGo's victory and Taylor's defeat happened at about the same time. This should be a warning to us. It is one thing to use AI within a game with clear rules and clear goals. It is something very different to use AI in the real world. The unpredictability of the real world may bring to the surface a troubling software problem.

Eric Schmidt is one of the bosses of Google, which owns AlphaGo. He thinks AI will be positive for humans. He said people will be the winner, whatever the outcome. Advances in AI will make human beings smarter, more able and "just better human beings."

36. What does the author want to show with the example of AlphaGo's victory?

A) Computers will prevail over human beings.

B) Computers have unmatched potential.

C) Computers are man's potential rivals.

D) Computers can become highly intelligent.

37. What does the author mean by AI machines acting ethically?

A) They are capable of predicting possible risks.

B) They weigh the gains and losses before reaching a decision.

C) They make sensible decisions when facing moral dilemmas.

D) They sacrifice everything to save human lives.

38. What is said to be the bigger challenge facing humans in the AI age?

A) How to make super-intelligent AI machines share human feelings.

B) How to ensure that super-intelligent AI machines act ethically.

C) How to prevent AI machines doing harm to humans.

D) How to avoid being over-dependent on AI machines.

39. What do we learn about Microsoft's "chatbot" Taylor?

A) She could not distinguish good from bad.

B) She could turn herself off when necessary.

C) She was not made to handle novel situations.

D) She was good at performing routine tasks.

40. What does Eric Schmidt think of artificial intelligence?

A) It will be far superior to human beings.

B) It will keep improving as time goes by.

C) It will prove to be an asset to human beings.

D) It will be here to stay whatever the outcome.

Passage Two

Questions 41 to 45 are based on the following passage.

Roughly the size of a soda can, sitting on a bookshelf, a relatively harmless gadget may be turning friends away from your home. The elephant in your living room is your Internet-connected security camera, a device people are increasingly using for peace of mind in their homes. But few stop to think about the effect these devices may have on house guests. Should you tell your friends, for instance, that they're being recorded while you all watch the big game together?

“It's certainly new territory, especially as home security cameras become easier to install,” says Lizzie Post, president of the Emily Post Institute, America's foremost manners advisors. “I think it will be very interesting to see what etiquette (礼仪) emerges in terms of whether you tell people you have a camera or not, and whether guests have a right to ask that it be turned off, if it's not a security issue.”

Post wants to make clear that she's not talking about legal rights, but rather personal preference. She also wants to explain that there are no right or wrong answers regarding manners on this front yet, because the technology is just now becoming mainstream. Besides, the Emily Post Institute doesn't dictate manners.

When it comes to security cameras, Post says it's a host's responsibility to make sure guests feel comfortable within their home. “I'm always a fan of being open and honest.” For instance, if the host casually acknowledges that there is a camera in the room by telling a story about it, that may be enough to provide an opening for a guest to say if they are uncomfortable.

However, if a contractor is working in your home, you don't need to tell them that there are cameras watching. Then again, the air of accountability that the camera generates can also work in contractors' favor. “If anything does go wrong while they're in the house, they don't want to be blamed for it,” she says. “In fact, the camera could be the thing that proves that they didn't steal the $20, or knock the vase off the table.”

41.For what reason may your friends feel reluctant to visit your home?

A) The security camera installed may intrude into their privacy.

B) They don’t want their photos to be circulated on the Internet.

C) The security camera may turn out to be harmful to their health.

D) They may not be willing to interact with your family members.

42.What does Lizzie Post say is new territory?

A) The effect of manners advice on the public.

B) Cost of applying new technologies at home.

C) The increasing use of home security devices.

D) Etiquette around home security cameras.

43. What is Lizzie Post mainly discussing with regard to the use of home security cameras?

A) Legal rights. C) Likes and dislikes of individuals.

B)Moral issues D) The possible impact on manners.

44. What is a host’ s responsibility regarding security cameras, according to Lizzie Post?

A) Making their guests feel at ease.

B) Indicating where they are.

C) Turning them off in time.

D) Ensuring their guests’ privacy.

45. In what way can the home security camera benefit visitors to your home?

A) It can satisfy their curiosity.

B) It can prove their innocence.

C) It can help them learn new technology.

D) It can make their visit more enjoyable.

Passage Three

Questions 46 to 50 are based on the following passage.

"The dangerous thing about lying is people don't understand how the act changes us," says D an Ariely, behavioral psychologist at Duke University. Psychologists have documented children ly ing as early as the age of two. Some experts even consider lying a developmental milestone, like c rawling and walking, because it requires sophisticated planning, attention and the ability to see a si tuation from someone else's perspective to manipulate them. But, for most people, lying gets limit ed as we develop a sense of morality and the ability to self-regulate.

Harvard cognitive neuroscientist Joshua Greene says. for most of us, lying takes work. In stu dies, he gave subjects a chance to deceive for monetary gain while examining their brains in a functional MRI machine, which maps blood flow to active parts of the brain. Some people told the truth instantly and instinctively. But others opted to lie, and they showed increased activity in their frontal parietal (颅腔壁的) control network, which is involved in difficult or complex thinking. This suggests that they were deciding between truth and dishonesty – and ultimately opting for the letter. For a follow-up analysis, he found that people whose neural (神经的) reward centers were more active when they won money were also more likely to be among the group of liars – suggesting that lying may have to do with the inability to resist temptation.

External conditions also matter in terms of when and how often we lie. We are more likely to lie, when we are able to rationalise it, when we are stressed and fatigued or see others being dishonest. And we are less likely to lie when we have moral reminders or when we think others are watching. “We as a society need to understand that, when we don’t punish lying, we increase the probability it will happen again.” Ariely says.

In a 2016 study published in the journal Nature Neuroscience, Ariely and colleagues showed how dishonesty alters people’s brains, making it easier to tell ties in the future. When people uttered a falsehood, the scientists notice a burst of activity in their amygdala. The amygdala is

crucial part of the brain that produces fear, anxiety and emotional responses— including that sinking, guilty feeling you get when you lie. But when scientists had their subjects play a game in which they won money by deceiving their partner, they noticed the negative signals from the amygdala began to decrease. Not only that, but when people faced no consequences for dishonesty, their falsehood tended to get even more sensational. This means that if you give people multiple opportunities to lie for their own benefit, they start with little lies which get bigger over time.

46. Why do some experts consider lying a milestone in a child's development?
A) It shows they have the ability to view complex situations from different angles.
B) It indicates they have an ability more remarkable than crawling and walking.
C) It represents their ability to actively interact with people around them.
D) It involves the coordination of both their mental and physical abilities.
47. Why does the Harvard neuroscientist say that lying takes work?
A) It is hard to choose from several options.
B) It is difficult to sound natural or plausible.
C) It requires speedy blood flow into one's brain.
D) It involves lots of sophisticated mental activity.
48. Under what circumstances do people tend to lie?
A) When they become too emotional.
B) When they face too much peer pressure.
C) When the temptation is too strong.
D) When the consequences are not imminent.
49. When are people less likely to lie?
A) When they are worm out and stressed.
B) When they are under watchful eyes.
C) When they think in a rational way.
D) When they have a clear conscience.
50. What does the author say will happen when a liar does not get punished?
A) They may feel justified.
B) They will tell bigger lies.
C) They will become complacent.
D) They may mix lies and truths.

第三部分：信息匹配（本部分共 10 小题，每题 1 分，共 10 分）

Section A

Directions: *There is a passage in this section. The Passage has six paragraphs, A-F.Choose the correct heading for each paragraph from the list of headings below. Drag the correct number, 1-7, into boxes A-F on* ***Answer Sheet 2.***

1. Differences between languages highlight their impressiveness
2.The way in which a few sounds are organised to convey a huge range of meaning
3.Why the sounds used in different languages are not identical
4.Apparently incompatible characteristics of language
5. Even silence can be meaningful
6. Why language is the most important invention of all
7.The universal ability to use language

51.Paragraph A( ) 53.Paragraph C( ) 55.Paragraph E( )
52.Paragraph B( ) 54.Paragraph D( ) 56.Paragraph F( )

‘This Marvellous Invention’

A Of all mankinds manifold creations, language must take pride of place. Other inventions — the wheel, agriculture, sliced bread — may have transformed our material existence, but the advent of language is what made us human. Compared to language, all other inventions pale in significance, since everything we have ever achieved depends on language and originates from it. Without language, we could never have embarked on our ascent to unparalleled power over all other animals, and even over nature itself.

B But language is foremost not just because it came first. In its own right it is a tool of extraordinary sophistication, yet based on an idea of ingenious simplicity: ‘this marvellous invention of composing out of twenty-five or thirty sounds that infinite variety of expressions which, whilst having in themselves no likeness to what is in our mind, allow us to disclose to others its whole secret, and to make known to those who cannot penetrate it all that we imagine, and all the various stirrings of our soul’. This was how, in 1660, the renowned French grammarians of the Port-Royal abbey near Versailles distilled the essence of language, and no one since has celebrated more eloquently the magnitude of its achievement. Even so, there is just one flaw in all these hymns of praise, for the homage to languages unique accomplishment conceals a simple yet critical incongruity. Language is mankind’s greatest invention — except, of course, that it was never invented. This apparent paradox is at the core of our fascination with language, and it holds many of its secrets.

C Language often seems so skillfully drafted that one can hardly imagine it as anything other than the perfected handiwork of a master craftsman. How else could this instrument make so much out of barely three dozen measly morsels of sound? In themselves, these configurations of mouth — p,f,b,v,t,d,k,g,sh,a,e and so on — amount to nothing more than a few haphazard spits and splutters, random noises with no meaning, no ability to express, no power to explain. But run them through the cogs and wheels of the language machine, let it arrange them in some very special orders, and there is nothing that these meaningless streams of air cannot do: from sighing the interminable boredom of existence to unravelling the fundamental order of the universe.

D The most extraordinary thing about language, however, is that one doesn’t have to be a genius to set its wheels in motion. The language machine allows just about everybody — from pre-modern foragers in the subtropical savannah, to post-modern philosophers in the suburban sprawl — to tie these meaningless sounds together into an infinite variety of

subtle senses, and all apparently without the slightest exertion. Yet it is precisely this deceptive ease which makes language a victim of its own success, since in everyday life its triumphs are usually taken for granted. The wheels of language run so smoothly that one rarely bothers to stop and think about all the resourcefulness and expertise that must have gone into making it tick. Language conceals art.

E Often, it is only the estrangement of foreign tongues, with their many exotic and outlandish features, that brings home the wonder of languages design. One of the showiest stunts that some languages can pull off is an ability to build up words of breath-breaking length, and thus express in one word what English takes a whole sentence to say. The Turkish word ?ehirlili?tiremediklerimizdensiniz, to take one example, means nothing less than ‘you are one of those whom we cant turn into a town-dweller’. (In case you were wondering, this monstrosity really is one word, not merely many different words squashed together — most of its components cannot even stand up on their own.)

F And if that sounds like some one-off freak, then consider Sumerian, the language spoken on the banks of the Euphrates some 5,000 years ago by the people who invented writing and thus enabled the documentation of history. A Sumerian word like munintuma’a (‘when he had made it suitable for her’) might seem rather trim compared to the Turkish colossus above. What is so impressive about it, however, is not its lengthiness but rather the reverse — the thrifty compactness of its construction. The word is made up of different slots, each corresponding to a particular portion of meaning. This sleek design allows single sounds to convey useful information, and in fact even the absence of a sound has been enlisted to express something specific. If you were to ask which bit in the Sumerian word corresponds to the pronoun ‘it’ in the English translation when he had made it suitable for her, then the answer would have to be nothing. Mind you, a very particular kind of nothing: the nothing that stands in the empty slot in the middle. The technology is so fine-tuned then that even a non-sound, when carefully placed in a particular position, has been invested with a specific function. Who could possibly have come up with such a nifty contraption?

Section B

Directions: *Complete the summary of the passage using the list of words, A-G, below .Write the correct letter, A-G, into boxes 57-60 on* ***Answer Sheet 2.***

The importance of language

The wheel is one invention that has had a major impact on 57 _____ aspects of life, but no impact has been as 58 _____ as that of language. Language is very 59 _____, yet composed of just a small number of sounds. Language appears to be 60 _____ to use. However, its sophistication is often overlooked.

A. difficult B. complex C. original
D. admired E. material F. easy
G. Fundamental

第四部分：选词填空（本部分共 10 小题，每题 1 分，共 10 分）

Directions: *In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is*

identified by a letter. Please write the corresponding letter for each item on ***Answer Sheet 2****. You may not use any of the words in the bank more than once.*

Water quality is a major concern in China largely due to man-made pollution and natural contamination. According to a ____61____ study completed in 2011 by the Ministry of Environmental Protection and the Chinese Academy of Engineering(中国工程院), over 90 percent of the groundwater in cities was ____62____ to different degrees. Of 118 major cities, 64 percent had ____63____ contaminated groundwater supplies. Furthermore, laboratory tests ____64____ by the Ministry of Water Resources found that 20 percent of China's rivers were so badly polluted that their waters were too dangerous to even come in ____65____ with. These ____66____ water pollution statistics can be ____67____ back to sources including manufacturing ____68____, poorly treated sewage, industrial spills, and agricultural runoff. With 70 percent of China's population ____69____ on groundwater for their ____70____ water supply, these startling numbers present a very serious health concern. Unfortunately, pollution is only half of the country's water problem.

A.seriously	D.alarming	G.contact	J.polluted	M.conducted
B.emissions	E.joint	H.traced	K.depending	N.dying
C.minor	F.joining	I.traveled	L.drinking	O.(忘了，但不是正确答案)

第五部分：议论文写作：从以下两个题目中二选一，不少于 150 词，本部分共 15 分。

1. Should college students be allowed to change their majors midway? Give some reasons to support you.

2. Some students prefer courses with long teaching time but short reading time and assignments. Some students prefer courses with short teaching time but challenging assignments.What is your choice? Give some reasons to support you.
